

## Flexible Steel Conduit

### Description:

Galvanized steel, square lock type/inter lock type  
Excellent flexibility, crushing resistance  
Application area: protect cable and wire on transportation system engineering/auto-control equipment/ transmission and distribution system/communication system/ship/mansion/plant/outdoors

## Flexible Stainless Steel Inter-lock Conduit

### Description:

Stainless steel 301/304  
Excellent flexibility, resistance to high pressure and temperature, crushing resistance, good anti-corrosion and dust durable  
Application area: used for mechanical instrumentation, medical treatments, telephone communication equipment.

## Vacuum Cleaner Hose

Type: VCH1  
With PVC Coated

Type: VCH2  
Without PVC Coated

### Description:

In a variety of industrial vacuum dust collectors  
PVC jacketed and rubber wire ended  
High seal ability, high temperature resistant and high flexibility, durable to oil and corrosion  
Aluminum pipe and plastic connector can be ordered respectively.

## Gas Tube with Connector

### Description:

Need to customize production
